

DAILY HERALD.

Single Copies of the Herald, 6 Cents.

Herald Steam Printing House.

The Herald Steam Printing House is not surpassed by any job printing office on the Pacific Coast, outside of San Francisco, in facilities for doing job work. Low prices, prompt work and attention may be relied upon at this office.

Special Notice.

Heretofore notices of companies, societies, churches, etc., will only be inserted in the Herald as paid advertisements. We reserve the places of worship a gratuitous directory which will appear every Sunday morning.

The Herald office is connected with the telephone system of Los Angeles city and county. Orders for advertisements and work may be sent through this medium to number 156.

The Herald is the official paper of the city of Los Angeles. The city clerk and all other municipal officers appear only in its columns.

A. B. N. H. is the Santa Ana agent of the Herald.

California Horse at the East.

This year has not only California horses at the East but also California horses at the East. San Francisco has given lively expression to the awakened interest in our California horses. We quote as follows from the leading journal of the Golden State:

"The interest in racing is becoming year by year more intense in this State, and judging from the present outlook, it will be but a short time ere we shall become as enthusiastic over the royal pastime as are the habitués of Newmarket or the amateurs of the blue-grass regions. This revival of interest dates from the time when some of our time-bred horses were sent to the East to enter the lists against the finest thoroughbred stock of Kentucky, and as the partial success they achieved encouraged our owners to enlarge the field of their operations the horses and their achievements have been followed with increased interest and now they have become as household words in our midst. This feeling is not confined to those classes who seek excitement on the race course in witnessing the various phases of a well-fought contest, nor to those who love to back their judgment on the result. The Californian has inherited the true love for the horse, and he is proud to see that the finest specimens of the trotter and racer are to be found in his own State, and he hopes in a few years to see this supremacy acknowledged all over the Union. Another reason why so much interest is taken in the matter is that, thanks to the efficient management of the Blood-Horse Association, our citizens have been able to judge themselves of the merits of our best thoroughbreds. Ben Ali, Volante, Alta, Hidalgo and a score of other flyers attracted thousands of spectators to the spring races of the association, and it is to be hoped that during the coming fall we shall see them all again on the same grounds after the most successful season on the Eastern tracks."

Thus far we have every reason to be proud of the achievements of our cracks in the best company. The winnings this season may not form quite so large an aggregate as in the previous year at the same period; still, they have carried off in which they were engaged. The fact is that from east to west they have captured all the famous bred stakes, the Kentucky, the St. Louis, the Coney Island and the Chicago trophies being wrested from fields in which figured the very pick of the best three-year-olds in the country. The horsemen at the East are perfectly astounded at this success and seek to attribute the defeat of their favorites to other than the true cause. They point to the fact that Tyrant, the winner last year of the great double event, the Belmont and the Withers, is a Kentucky-bred horse, as is also that grand specimen of the thoroughbred, Ben Ali, who, in the opinion of some of our best judges, when in fit condition can give five pounds and a beating to the best three-year-old in the country. But these objections are, in the main, more fallacious, as the Chicago Derby, with its valuable stakes from nearly a hundred nominations has fallen two years in succession to California-bred horses, Volante being the winner in 1885, as is Silver Cup in 1886, and both sired by the same sire, the famous California-bred colt, or the famous California-bred colt, from Mollie McCarty to Mollie McCarty's last, must be counted Macdonald, who had the honor of figuring with the top weight in the Suburban handicap, in which all the cracks of the country were entered. Thus, in five years we have made such a notable advance in breeding, it is, as before remarked, a mere question of time when our horses will be unrivaled in the land. It must be confessed, however, that there is a serious drawback to our success in the sudden and violent change of climate to which our horses are subjected on their journey to the East to follow their spring engagements. The chief inducements for trainers to winter their racing stock in this State consist in the mild, equable climate, and the luxuriant growth of spring grasses. The horses can undergo their preparations here when those at the East are confined to their stables by the inclemency of the weather. They possess this great advantage in the spring events, but there is also a grave disadvantage in the way of change of climate affects the horses, especially among those of tender years. Even in using the greatest precaution in crossing the Rocky Mountains and the bleak plains of Nebraska, the animals are generally attacked by a mild form of influenza, that is not so seriously guarded against, develops in some cases proves fatal. Of the draft of nearly a hundred trainers and their horses, five of the most valuable youngsters died on the road, and all were landed at their destination suffering from coughs and colds. Never before did we send such a valuable consignment of thoroughbreds to the East as we did this year, but despite every care a great many suffered from the effects of the change, and even by the Southern route the result was the same, as shown by the experience of the Bald win stable. Rapid, one of the best of the lot, succumbed en route to pneumonia, and the other horses arrived at Louisiana in a debilitated condition, from which, however, as was the case in the other stables, the old campaigners rapidly recovered. Here is evidently a grave problem to be solved by our trainers. It is, as pretty well shown, our two-year-olds cannot stand this severe change of climate in the early spring, it will,

the future be far better to postpone their departure from this coast until the middle of June, when the weather is warmer and more settled at the East. There will naturally be a change even then, but it will be better for them to suffer from an excess of heat than from that of cold. Then the stables may be freed from these attacks of sickness ranging from influenza to a state of epilepsy, that so seriously interfere with their training and that have prevented our promising two-year-olds this season from realizing the success to which their form and breeding so fairly entitled them. There is no doubt that the difficulty will be surmounted. The trainers of our best running and trotting stock are giving the matter their serious attention. Charles Marvin and Orrin Hick both claim that when the voyage is made in June there are no ill effects.

Meeting of the Young Canadian Reformers.

A NOTED DIVORCE CASE.

A Terrible Explosion of Giant Powder—Bodies Blown to Fragments.

(Special to the Herald by the Associated Press.)

MONTREAL, July 2.—The Canadian Independence debate was resumed in the Young Men's Reform Convention yesterday, and it was moved that consideration of the question of Canada's Independence be postponed until next year's convention. The motion was voted upon and carried. A resolution was adopted declaring that the convention is convinced that no settlement of the respective fishing rights of Canada and the United States will prove satisfactory unless the policy of England in the negotiations is based on a recommendation of the Canadian government; protesting against the encroachment of the Federal government upon the rights of the provinces; declaring that the right of Canada to self-determination is an American act to charter railways within its boundaries should not be interfered with; also that this convention is strongly in favor of a treaty of reciprocity with the United States. A motion to abolish the Senate was carried by a vote of 25 to 20, the negative being in favor of retaining it. A resolution favoring the appointment of a board of arbitration was also passed.

A Noted Divorce Case.

LONDON, July 2.—In the divorce case of Lady Campbell against her husband, Lord Colin Campbell, the fifth son of the Duke of Argyll, the defendant today applied to the Divorce Court for judgment on the grounds of adultery. The plaintiff's petition charges him with adultery with persons unknown, the counsel charged him with adultery on the prayer for a fortnight, and in the meantime will read the whole correspondence, and all the affidavits submitted by Lord Campbell in his cross-suit to substantiate his charges that Lady Campbell has been guilty of adultery with the Duke of Marlborough, Chief Fire Commissioner Shaw, and others.

AN EXPLOSION.

Giant Powder Plugs Have in New Jersey.

NORRISTOWN, N. J., July 2.—A terrible explosion took place this morning at 7:30 o'clock at the Atlantic Trawl Net Works, situated between McKeesville and Drakeville, resulting in the loss of ten lives and injury to ten or twelve others. The explosion took place in the mixing house. The cause as yet is unknown. The amount of the loss is not known but is very heavy. The explosion was felt distinctly for twenty miles around and glass in houses five miles away was shattered.

The cause of the Atlantic Trawl powder explosion at McKeesville will probably never be known.

A double force of men engaged to work at the Atlantic Trawl Net Works, situated between McKeesville and Drakeville, resulting in the loss of ten lives and injury to ten or twelve others. The explosion took place in the mixing house. The cause as yet is unknown. The amount of the loss is not known but is very heavy. DAY DISPATCHES.

SAN FRANCISCO, July 2.—Among the principal subscribers at a meeting last night in aid of the Irish Parliamentary Fund were: The Young Ireland Parliamentary Club, one thousand dollars; Loring Pickering, two hundred and fifty dollars; Senator George Hearst, two hundred and fifty dollars; ex-Senator Sargent, one hundred dollars; Knights of St. Patrick, two hundred and fifty dollars; Levi Strauss, one hundred dollars; J. K. Fiehan, one hundred dollars, and several others for a similar amount. Further subscriptions can be forwarded to Donahue, Kelly & Co.'s Bank.

Fremont Admitted to Bail.

HOLLISTER, July 2.—Judge Rees this morning denied defendant's motion to dismiss action against John T. Fremont for the murder of Dr. Powers, and to discharge the defendant. The case was then set for trial on November 15th, 1886. Defendant was admitted to bail fixed at \$10,000.

The Solon Extension.

SAN FRANCISCO, July 2.—The Southern Pacific's Solon Extension is now completed as far as San Lorenzo Creek, and will be operated on the 15th inst. The distance is 25 miles, and there will be four stations, but the exact location of each has not yet been decided.

FINANCE AND TRADE.

Government Bonds and Railway Shares.

NEW YORK, July 2.—Three per cent Government bonds, 100; four per cent, 125; four and a half per cent, 132; Central Pacific, 42; Denver & Rio Grande, 15; Kansas & Texas, 30; Northern Pacific, 27; preferred, 60; Chicago & Northwestern, 114; New York Central, 100; Oregon, 100; Transcontinental, 33; Oregon Improvement, 21; Pacific Mail Steamship, 54; Panama Railway, Texas & Pacific, 100; Union Pacific, 54; United States Express, 63; Wells, Fargo & Co.'s Express, 123; Western Union Telegraph, 54.

New York Money Market.

NEW YORK, July 2.—Money on call loaned from 10 to 15 per cent, clearing of 10 to 15 per cent. Paper, 4 to 5 per cent, sterling exchange dull and steady.

Mining Stocks.

SAN FRANCISCO, July 2.—No stocks today. Board adjourned until Tuesday.

The Grain Market.

CHICAGO, July 2.—Wheat—Demand, 100; No. 2 winter, 64 1/2; spring, 61 1/2.

Flour—Demand poor, 74 1/2. Spot and July, 42 1/2 per cent; August, 44 1/2.

Pork.

CHICAGO, July 2.—Pork—Cash, \$10.40 per barrel; August, \$10.25; September, \$10.35.

Petroleum.

NEW YORK, July 2.—Petroleum—Firm. United Pipe Line closed at 60c per barrel.

Instantly Relieved.

Mrs. Ann Lacombe, of New Orleans, La., writes: "I have a son who has been sick for two years, he has been attended by our leading physicians, but all to no purpose. This morning he had a seizure, and he died. I was so greatly prostrated in consequence that death seemed imminent. We had in the house a bottle of Dr. Williams' Pink Pills for the Pale People, purchased by my husband yesterday. We administered it, and he was instantly relieved."

Sea-Side Celebration.
